Re: School Soccer Field Use

Dear Association,

I just wanted to send a reminder to the association asking that youth soccer teams not schedule practice on the Gretna High School varsity/junior varsity practice fields. These fields are located southeast of the high school.

There are two football/soccer practice fields located just to the west of the competition soccer field (both have football goalpost located on each end) which are used for high school football practice in the fall and then for varsity soccer practices in the spring. We are trying to limit their use so that our grounds people can maintain those fields and keep them in good condition for the safety of our athletes.

**We are asking everyone to please not schedule practice on the 2 practice fields just to the west of the competition soccer field even when they are not being used by the high school after 6:00 p.m.**

Some of the places available for your kids to practice at school locations:

- Middle School:       - Area south of the middle school.  
                              - Area between the middle school and the K-2 elementary school. (Located northeast of the middle school and south of the grade school).
- High school:         - Area between the 2 high school practice fields and the United Methodist Church (Located south of the high school and just east of the church).
- Thomas Elementary: - Area located between the school and the tennis courts. (This area is south of the school and north of the courts, but is currently a little underdeveloped.)

We would appreciate your help advising the many coaches who take the time to coach youth soccer of our wishes. Thank you for your cooperation.

Sincerely,

Todd Mueller  
Gretna High School Activities Director
