

Below are the types of workers needed to build the outdoor rinks. We are starting to compile a list of people willing to help in all areas so please send Tony an email and he will add you to the email list for communications on the project. Also, if there is a member that would help us coordinate the project, contact me:

Skilled/Unskilled people needed:

Dirt work

Excavation of warming house

Below grade insulation of warming house (unskilled)

Backfilling of warming house

Final grading of warming house

Masonry

Laborers for below grade block (Unskilled, in good shape)

Block layers for below grade block

Laborers for concrete floor (Unskilled, in good shape)

Concrete finishers

Carpenters

Framers for roof

Set trusses

Frame sub fascia

Set Commercial windows and doors

Roof

Roofers

Laborers (Unskilled)

Aluminum soffit and fascia installer

Heating Contractor

Run gas lines and hook ups for 3 Reznor heaters

Electrical Contractors

Set up service

Spot boxes and run wires for lights/outlets for building

Run wire and disconnects for rink lights

Insulation

Blow insulations in attic space

General labor to set up hockey boards.

The boards will not be difficult to set up but will take many people to set up two sets. This is the area where we will need a lot of help.
