

MODEL SS600

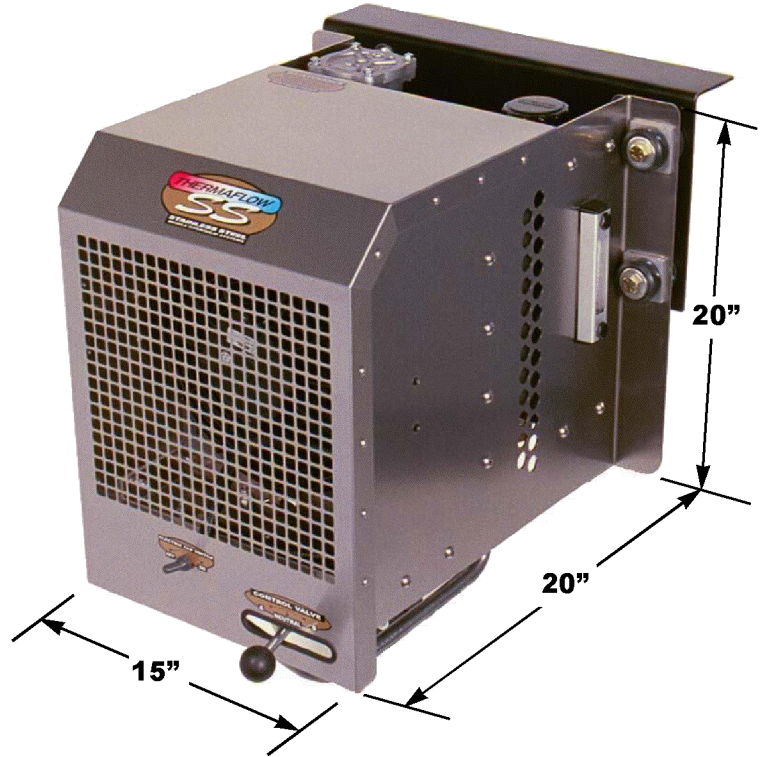

HYDRAULIC COOLING SYSTEM

The THERMAFLOW SS600 cooler assembly combines the efficiency of an all aluminum heat exchanger with the strength and good looks of stainless steel.

The SS600 design conveniently allows for either an electric fan motor or hydraulic fan motor whichever is your preference.

The SS600 also incorporates an optional directional control valve kit for changing the direction of the drive motor or for selecting between pump drives.

Your SS600 Mobile Hydraulic System will give you years of safe and reliable operation.

A Stronger And More Efficient Cooling System That Will Make Your Truck or Fleet Stand Out.

FEATURES

- **Stainless Steel Construction**
- **Protected Heat Exchanger**
- **No-Mess Oil Filter Replacement**
- **Rubber Shock Mounts**
- **Easy Maintenance Access**

SPECIFICATIONS

| | |
|----------------------|-----------------|
| Flow Rate: | 30 GPM |
| Max Pressure: | 5000 PSI |
| Reservoir: | 3.5 GALS |
| Weight (Dry): | 79 LBS |
| Warranty: | 2 YEARS |

OPTIONS

- Hydraulic Fan**
- Electric Fan**
- Directional Control Valve Kit**

Dedicated Hydraulic Drive Specialists for the Bulk Transportation Industry.

APPLICATIONS

- Chemicals**
- Food Grade**
- Refined Fuels**
- Propane/Anhydrous**
- Compressors**
- Vacuum Pumps**
- Many Others.....**

Complete Hydraulic Systems Available.
