Very quickly, you will receive an e-mail that looks like this, with a link for you to click on.

Your browser will open and you will see a Music Download page like this. Clicking on the highlighted file name, you will be asked if you want to Open or Save the MP3 file. Whichever you choose will take a few minutes to complete. Be patient because that's a lot of minutes of game audio that needs to download to your computer.

Once the download finishes, Windows Media Player will open and the file will start to play.
