

Dear Administrators, Directors, Coaches and Educators:

Greetings! We have a **FREE** offer for up to 5 of your Student Athletes in your building. **College Bound Athletic Connection's (CBAC)** website went live in 1999 and has helped hundreds of high school Student-Athletes enroll into a college or university, often in exchange for a scholarship. We invite you to take a few minutes and look at our website at GoCollegeBound.org and see that we are ready to add your student-athletes that are serious about playing a sport in college hopefully in exchange for a scholarship and begin the college recruitment process.

CBAC's mission is to increase high school graduation and college enrollment in exchange for scholarships and aid.

CBAC works for the Student-Athlete (student) and their family by promoting academic and athletic statistics and achievements to College Coaches and Scouts via the Internet. CBAC's program is designed to assist and educate the student and their family while we compile a comprehensive fact based student resume to release to college coaches and scouts. Resumes include current academic and athletic statistics, sports videos, references, recommendations and achievements so to impress college coaches as to why that student would be a great addition to their rosters. CBAC gets results with our tried and proven program. Our program encourages Student-Athletes to work hard both in the classroom and on the field and expect success. The students are empowered and often become more serious about their futures.

Our extensive college contact database includes all college coaches' names, addresses, phone numbers and emails for all sports at NCAA Division 1, 2, 3, Junior Colleges (JUCO) and NAIA Colleges and Universities. Our constantly updated college contact database, bundled with the student's comprehensive resumes and sports videos along with CBAC's professional reputation is a winning combination that results often in contact, dialogue and visits between colleges and students.

FOR A LIMITED TIME, we offer your High School our program for up to five (5) students to be added to our website at www.GoCollegeBound.org for FREE. This offer is being made for serious and qualified students in any sport. This offer is being made to other schools and we have a limited time and number of slots available in our program, so it is first come first serve.

We simply ask that your High School select Student-Athletes that are already at the Varsity level as freshmen, sophomores, juniors or a limited number of seniors. We need Student-Athletes that are serious about playing at the College level and are or eligible to become NCAA Clearinghouse Certified. We ask that the student and families be willing to participate in the recruitment process by submitting academic and athletic updates regularly as their resumes can be viewed and shared with college coaches and scouts 24/7/365.

If you have Student-Athletes that fit that bill and are looking for a college to play their chosen sport, CBAC can promote the student-athlete via our website to hundreds and thousands of college coaches!

Students begin CBAC's recruitment program when they complete their unique sport application online at www.GoCollegeBound.org. Students will submit videos, references and academic and sports statistics, all fact based to complete their resumes to CBAC. Students and their parents/guardians will be involved in the entire process. NO personal contact information such as phone numbers, email addresses, home addresses will be included on the public website. When college coaches are contacted by email, only high school and/or club coaches, administrators, parents or guardians contact information will be released to assure privacy of the students under 18 years of age.

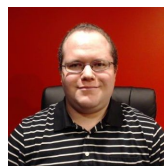

We often see how publicizing the student's resume on our website ignites the Student-Athlete to solidify or improve their GPA, ACT/SAT scores and their sports statistics. It is predictable that Student-Athletes get more involved and frankly more serious about taking their game to college with our program. CBAC helps to increase high school graduation and college enrollment although no one can guarantee a scholarship or financial aid.

Please visit our website and feel free to contact us to discuss and explain what is needed and what to expect from us. We welcome your inquiry.

Sincerely,

Randy R. Emrich
